The scientific questions that the Large Synoptic Survey Telescope (LSST) project will address are profound and it would be impossible to list all the possible projects that LSST data will enable. Read more about LSST science goals. Science Collaboration Publication Policies Each LSST Science Collaboration develops its own publication policy, based on a template policy that can be used, revised, or expanded as it fits (Word (link is external), PDF (link is external), Google Doc (link is external)). There are currently eight active LSST Science Collaborations. Additional information about their work and membership can be found at the links below or by contacting the individual chairs, or the LSSTC Science Collaborations Coordinator (LSSTCSCC), Federica Bianco. Galaxies.
