You need a Core i5-750 2.66GHz or Phenom II X4 945 processor coupled with a GeForce GTX 280 to run IL-2 Sturmovik: Cliffs of Dover system requirements at recommended. You can expect to get around 60FPS at 1080p screen res on high graphics settings with this hardware.

Please login to add your score for IL-2 Sturmovik: Cliffs of Dover Value played on the pc. Main score.  Alternative Game Tags: IL2SturmovikCliffsofDover, IL2 Sturmovik Cliffs of Dover, IL-2 Sturmovik: Cliffs of Dover requirements, il 2 storm of war, il2 storm of war, il2 cliffs of dover, ww2 flight sim, flight sim world war 2, IL2: COD, IL2 COD. IL-2 Sturmovik: Cliffs of Dover vs Avg. AAA Game System Requirements. Using “Il-2 Sturmovik” for a sim which has not only no Il-2 Sturmoviks in it, but not even any Russian planes (aside from the recent addition of the non-WWII Su-26), is an attempt to trade on the reputation of the series before it. The original name, Storm of War: Battle of Britain, would’ve been more appropriate.

Campaign contrasts - Battle of Britain II and Cliffs of Dover Blitz Edition. For one reason or another, I've found myself running single player RAF campaigns in parallel in these two Battle of Britain sims. As indeed you may have noticed, from recent mission reports.
