Download Citation on ResearchGate | Bell's orofacial pains: The clinical management of orofacial pain | The role of the BDJ is to inform its readers of ideas, opinions, developments and key issues in dentistry - clinical, practical and scientific - stimulating interest, debate and discussion amongst dentists of all disciplines. Problems can be particularly pronounced in patients with chronic orofacial pain, for whom pain often interferes with the ability to perform fundamental human behaviors, including talking, eating, and expressing emotions (Okeson, 2005). The extent to which pain interferes with such behaviors largely depends on pain intensity (Osborn, Jensen, Ehde, Hanley, & Kraft, 2007; Serlin, Mendoza, Nakamura, Edwards, & Cleeland, 1995; Wells, 2000).
