This book is the real life history of global modelling. It is concerned with the major models and those who make them, the whole craft of modelling, and their principal results. A feature is the honesty, candour, and clarity with which the authors discuss what global modelling taught them about modelling and what it taught them about the world. It could be described as a book on the sociology of a new science struggling with problems too large for the participants but too important to ignore.

This book is written for those who make complex models of complex social systems, those who have to make these systems work, and those who live in and care about the social systems that modellers make and about which decision makers make decisions.
I was groping in the dark down in this basement for ten minutes before I could find a light switch. 2. To seek (something) in a blind, aimless, or uncertain manner, especially to find a solution, meaning, or sense of purpose. We've been groping in the dark for a way to pay our mortgage, but I just don't see how we'll be able to afford it. Pretty much everyone gropes in the dark at some point or another, trying to figure out the meaning of life. See also: dark, grope. The outfit's onslaught to bring electricity to some 92 villages that are still groping in the dark is the main substance of a protocol agreement it signed with the Cameroon Government in May 2012. United States: SunErgy will provide electricity to 92 villages in Cameroon. Most people probably don't know we're groping in the dark. Groping in the dark, overwhelmed by the consequences of their acts, at every moment, groups and individuals faced with outcomes they had not intended. EurLex-2. This has spread panic amongst both breeders and consumers and given the impression that the Commission is blindly groping in the dark. OpenSubtitles2018. But for decades, he groped in the dark like everyone else, trying to make sense of the messiness of the quantum world. hunglish. We've been knocking around all our lives, groping in the dark, trying to find each other." Groping in the dark. Written by Embarcadero USA on Sunday, 12 August 2001 Posted in TOOLS. Following a brief discussion at a recent Delphi Development seminar led by Cary Jensen, which touched on some of the features of the Open Tools API and how it should be possible to improve the Alt-{ search inbuilt into the Delphi IDE, I decided to venture into the API myself to see what could be done. If you want to try the results, click here for the source. The problem. Basically the current Alt-{and Alt-} keystrokes in the editor allow you to move to the matching delimiter (Parentheses or Bracket) but gets confused if there are any of the relevant matching delimiters in strings or comments between the real pair, so on the line: FindNext(Context, ), False, False, False)
