Last Modified: 15 Nov 2016 21:13
The Cherry Blossom Grove is a forest made of white and pink Cherry Trees. Trees are reasonably spaced to create glades in this biome, filled with flowers. The terrain is a mixture of plain Dirt and Silty Dirt. Alongside Cherry Trees, there are Pink Daffodils and Grass. Villages do not spawn in this biome. The normal range of passive mobs, such as Sheep, spawn here. Cherry Blossom by KikiLynnHedgehog. Cherryblossom artwork from others by DragonlordT. Explore #cherryblossom. Currently they are widely distributed, especially in the temperate zone of the Northern Hemisphere including Japan, Nepal, India, Taiwan, Korea, Mainland China, West Siberia, Iran, Myanmar and Afghanistan. Along with the chrysanthemum, the cherry blossom is considered the national flower of Japan.
