Energy security is a difficult concept. It is a moving target, changing over time and place and having a multitude of elements and dimensions, as is well illustrated by this book by Katja Yafimava. A common approach to energy security is not to define it but rather to distinguish its risk dimensions. Here commentators have often divide these risks into reserve depletion, contractual regimes, investment in gas fields and necessary infrastructure, insecurity of transit routes and insecurity of other energy infrastructure. This contribution focuses on the transit dimension of EU energy ...
