A library for internists: recommended by the American College of Physicians

Abstract

Because the recent rapid growth in medical literature has roughly paralleled the growth of medical knowledge, it is impossible for the individual physician, course director, house staff officer, medical student, or hospital librarian to know and adequately evaluate all the available texts and journals in the many fields of internal medicine and in the many other specialties and clinical fields related to the practice of internal medicine. Consequently, the Medical Practice Committee of the American College of Physicians saw the need for a survey to establish a comprehensive list of the books and journals most useful for internists; Norman S.
The American College of Physicians (ACP) is a national organization of internal medicine physicians (internists)—specialists who apply scientific knowledge and clinical expertise to the diagnosis, treatment, and compassionate care of adults across the spectrum from health to complex illness. With 143,000 members, ACP is the largest medical-specialty organization and second-largest physician group in the United States. The official Facebook Page of the American College of Physicians. ACP invites you to... She’s traveled the world to treat the underserved and has made it her mission to educate medical students, residents, young physicians, and internists around the globe. Read more profiles of internists at http://bit.ly/qzL4XW. #IMProud. See All. The American College of Physicians (ACP) is a national organization of internists, who specialize in the diagnosis, treatment, and care of adults. With 154,000 members, ACP is the largest medical-specialty organization and second-largest physician group in the United States, after the American Medical Association. Its flagship journal, the Annals of Internal Medicine, is considered one of the five top medical journals in the United States and Britain.
