Abstract

This book is unique in presenting a critical historical and contemporary socio-political analysis of money and its policy implications from a green and feminist perspective. It has been well received, including by economists with a very favourable review in The Economic Journal. Mary Mellor’s contribution to this book was substantial as the main author of five of the ten chapters (including the introduction and conclusion) and joint author of two others with responsibility for overall editing. She has made many presentations based on the book in the UK and internationally, including the International Society for Ecological Economics in Delhi.
