bad things happen in it for this reason- Deviance. Deviance comes in many forms in society.
Social deviance is the study of the violations of societal and cultural norms. Norms play a crucial role in dictating the rules and expectation of behavior in society. The most common form of deviance that can be observed in society is crime, which is seen as the act of denial and nonconformity to the laws established by society. Furthermore, this form of deviance can be recognized throughout history across a wide range of societies and cultures. As a result, sociologists began to question the causes of deviance; these are institutions of socialization of norms in which the personality of the individual develops. These points are also the agencies of social control. It is the failure of learning of norms which creates deviance. Socializing institutions fail to perform their roles. The learning of norms is the basis of obedience to norms. The following are institutions of socialization of norms in which the personality of the individual develops. These are also the agencies of social control. Broken Family and Improper Socialization. Erikson argues that deviance serves functions for society, specifically that it fosters boundary maintenance, bolsters cohesion and solidarity, and promotes full employment for those who are in that sector. All of these aspects are closely integrated. One learns the placement of a community’s boundaries by participating in confrontations which occur when a person ventures too close to the curb and is met by policing agents.
