There are many reasons why a cookie could not be set correctly. Below are the most common reasons:

- You have cookies disabled in your browser. You need to reset your browser to accept cookies or to ask you if you want to accept cookies.
- Your browser asks you whether you want to accept cookies and you declined. To accept cookies from this site, use the Back button and accept the cookie.
- Your browser does not support cookies. Try a different browser if you suspect this.
- The date on your computer is in the past. If your computer's clock shows a date before 1 Jan 1970, the browser will automatically forget the cookie. To fix this, set the correct time and date on your computer.
- You have installed an application that monitors or blocks cookies from being set. You must disable the application while logging in or check with your system administrator.

Why Does this Site Require Cookies?

This site uses cookies to improve performance by remembering that you are logged in when you go from page to page. To provide access without cookies would require the site to create a new session for every page you visit, which slows the system down to an unacceptable level.

What Gets Stored in a Cookie?

This site stores nothing other than an automatically generated session ID in the cookie; no other information is captured.

In general, only the information that you provide, or the choices you make while visiting a web site, can be stored in a cookie. For example, the site cannot determine your email name unless you choose to type it. Allowing a website to create a cookie does not give that or any other site access to the rest of your computer, and only the site that created the cookie can read it.

In this book, futurist Brian David Johnson and cultural historian James Carrott explore steampunk, a cultural movement that's captivated thousands of artists, designers, makers, hackers, and writers throughout the world. Just like today, the late 19th century was an age of rapid technological change, and writers such as Jules Verne and H.G. Wells commented on their time with fantastic stories that jumpstarted science fiction. History Tomorrow. Michael Lee questions the use of using political historical sources. Michael Lee | Published in History Today Volume 36 Issue 1 January 1986. How many modern historians nowadays consider that they should regularly purchase HMSO publications, especially parliamentary papers? I am aware of a change in my own habits of buying for my personal working library, and wonder how many others have made a similar adjustment. It seemed important to know at an early stage what was available from the archive office of the clerk of Parliaments, what could be seen at the Public Record Office, and what could still be purchased from the HMSO. When I was a research student there were still back copies of old Command papers at a very reasonable price. (National Archives). Similarly, the Vietnam War demonstrated how technology does not always triumph in an asymmetric clash of arms. In the skies over North Vietnam, American aircraft armed with sophisticated air-to-air missiles met cannon-firing MiG fighters. Digitization poses challenges that cannot be met by only a small group of historians and archivists, a form of "distributed history." If distributed lethality enables every ship to be a lion, digitization and computer-based tools enable every Sailor to take ownership of their unit's accomplishments and play an active role in the generation of the COR.
