Individual Meaning-Centered Group Psychotherapy (IMCP), an intervention developed and rigorously tested by the Department of Psychiatry & Behavioral Sciences at Memorial Sloan-Kettering Cancer Center, is a seven-week program that utilizes a mixture of didactics, discussion and experiential exercises that focus around particular themes related to meaning and advanced cancer. Patients are assigned readings and homework that are specific to each session’s theme and which are utilized in each session. While the focus of each session is on issues of meaning and purpose in life in the face
