Pickett's Charge was an infantry assault ordered by Confederate Gen. Robert E. Lee against Maj. Gen. George G. Meade's Union positions on July 3, 1863, the last day of the Battle of Gettysburg in the state of Pennsylvania during the American Civil War. Its futility was predicted by the charge's commander, Maj. Gen. George Pickett, one of three Confederate generals who led the assault under Longstreet.

Pickett's Charge was part of Lee's "general plan" to take Cemetery Hill and the network of roads it commanded. His military secretary, Armistead Lindsay Long, described Lee's thinking:

"There was... a weak point... where [Cemetery Ridge], sloping westward, formed the depression through which the Emmitsburg road passes. Perceiving that by forcing the Federal lines at that point and turning toward Cemetery Hill [Hays' Division] would be taken in flank and the remainder would be neutralized.... Lee determined to attack at that point, and the execution was assigned to Longstreet."

On the night of July 2, Meade correctly predicted to General Gibbon, after a council of war, that Lee would attack the center of his lines the following morning.

The infantry attack was preceded by a massive artillery bombardment that was meant to soften up the Union defense and silence its artillery, but was largely ineffective. Approximately 12,500 men in nine infantry brigades advanced over open fields for three-quarters of a mile under heavy Union artillery and rifle fire. Although some Confederates were able to breach the low stone wall that shielded many of the Union defenders, they could not maintain their hold and were repulsed with over 50% casualties, a decisive defeat that ended the three-day battle and Lee's campaign into Pennsylvania.

Years later, when asked why his charge at Gettysburg failed, Pickett reportedly replied, "I've always thought the Yankees had something to do with it."

Confederate

Plans and command structures

The target of the Confederate assault was the center of the Union, Army of the Potomac's II Corps, commanded by Maj. Gen. Winfield S. Hancock. Directly in the center was the division of Brig. Gen. John Gibbon with the brigades of Brig. Gen. William Harrow, Col. Norman J. Hall, and Brig. Gen. Alexander S. Webb. (On the night of July 2, Meade correctly predicted to Gibbon at a council of war that Lee would try an attack on Gibbon's sector the following morning.) To the north of this position were brigades from the division of Brig. Gen. Alexander Hays, and to the south was Maj. Gen. Abner Doubleday's division of the I Corps, including the 2nd Vermont Brigade of Brig. Gen. George J. Stannard and the 121st Pennsylvania under the command of Col. Chapman Biddle. Meade's headquarters were just behind the II Corps line, in the small house owned by the widow Lydia Leister.

The specific objective of the assault has been the source of historical controversy. Traditionally, the "copse of trees" on Cemetery Ridge has been cited as the visual landmark for the attacking force. Historical treatments such as the 1993 film Gettysburg continue to popularize this view, which originated in the work of Gettysburg Battlefield historian John B. Bachelder in the 1880s. However, recent scholarship, including published works by some Gettysburg National Military Park historians, has suggested that Lee's goal was actually Ziegler's Grove on Cemetery Hill, a more prominent and highly visible feature, with trees around 300 yards (274 m) north of the copse. The much-debated theory suggests that Lee's general plan for the second-day attacks (the seizure of Cemetery Hill) had not changed on the third day, and the attacks on July 3 were also aimed at securing the hill and the network of roads it commanded. The copse of trees, currently a prominent landmark, was under ten feet (3 m) high in 1863, only visible to a portion of the attacking columns from certain parts of the battlefield.

From the beginning of the planning, things went awry for the Confederates. While Pickett's division had not been used yet at Gettysburg, A.P. Hill's health became an issue and he did not participate in selecting which of his troops were to be used for the charge. Some of Hill's corps had fought lightly on July 1 and not at all on July 2. However, troops that had done heavy fighting on July 1 ended up making the charge.

Although the assault is known to popular history as Pickett's Charge, overall command was given to James Longstreet, and Pickett was one of his divisional commanders. Lee did tell Longstreet that Pickett's fresh division should lead the assault, so the name is appropriate, although some recent historians have used the name Pickett-Pettigrew-Tremple Assault (or, less frequently, Longstreet's Assault) to more fairly distribute the credit (or blame). With Hill sidelined, Pettigrew's and Trimble's divisions were delegated to Longstreet's authority as well. Thus, Pickett's name has been lent to a charge in which he commanded 3 of the 11 brigades while under the supervision of his army commander, Longstreet. Pickett's men were allocated practically exclusively from Virginia, with the other divisions consisting of troops from North Carolina, Mississippi, Alabama, and Tennessee. The supporting troops under Wilcox and Lang were from...
In conjunction with the infantry assault, Lee planned a cavalry action in the Union rear. Maj. Gen. J.E.B. Stuart led his cavalry division to the east, to prepare to exploit Lee's hoped-for breakthrough by attacking the Union rear and disrupting its line of communications (and retreat) along the Baltimore Pike.

Despite Lee’s hope for an early start, it took all morning to arrange the infantry assault force. Neither Lee’s nor Longstreet’s headquarters sent orders to Pickett to have his division on the battlefield by daylight. Historian Jeffrey D. Wert blames this oversight on Longstreet, describing it either as a misjudgment of Lee’s verbal order or a mistake. Some of the many criticisms of Longstreet’s Gettysburg performance by the postbellum Lost Cause authors cite this failure as evidence that Longstreet deliberately undermined Lee's plan for the battle.

Meanwhile, on the far right end of the Union line, a seven-hour battle raged for the control of Culp’s Hill. Lee's intent was to synchronize his offensive across the battlefield, keeping Meade from concentrating his numerically superior force, but the assaults were poorly coordinated and Maj. Gen. Edward 'Allegheny' Johnson’s attacks against Culp’s Hill petered out just as Longstreet’s cannonade began.

### Artillery barrage

The infantry charge was preceded by what Lee hoped would be a powerful and well-concentrated cannonade of the Union center, destroying the Union artillery batteries that could defeat the assault and demoralizing the Union infantry. But a combination of inept artillery leadership and defective equipment doomed the barrage from the beginning. Longstreet’s corps artillery chief, Col. Edward Porter Alexander, had effective command of the field. Lee’s artillery chief, Brig. Gen. William N. Pendleton, played little role other than to obstruct the effective placement of artillery from the other two corps. Despite Alexander’s efforts, then, there was insufficient concentration of Confederate fire on the objective.

The July 3 bombardment was likely the largest of the war, with hundreds of cannons from both sides firing along the line for one to two hours, starting around 1 p.m.

Confederate guns numbered between 150 and 170 and fired from a line over two miles (3 km) long, starting in the south at the Peach Orchard and running roughly parallel to the Emmitsburg Road. Confederate Brig. Gen. Evander M. Law wrote: "The cannonade in the center ... presented one of the most magnificent battle-scenes witnessed during the war. Looking up the valley towards Gettysburg, the hills on either side were capped with crowns of flame and smoke, as 300 guns, about equally divided between the two sides, vomited their iron hail upon each other."

Despite its ferocity, the fire was mostly ineffectual. Confederate shells often overshot the infantry front lines—in some cases because of inferior shell fuses that delayed detonation—and the smoke covering the battlefield concealed that fact from the gunners. Union artillery chief Brig. Gen. Henry J. Hunt had only about 80 guns available to conduct counter-battery fire, the geographic features of the Union line had limited areas for effective gun emplacement. He also ordered that firing cease to conserve ammunition, but to fool Alexander, Hunt ordered his cannons to cease fire slowly to create the illusion that they were being destroyed one by one. By the time all of Hunt's cannons ceased fire, and still blinded by the smoke from battle, Alexander fell for Hunt's deception and believed that many of the Union batteries had been destroyed. Hunt had to resist the strong arguments of Hancock, who demanded Union fire to lift the spirits of the infantrymen pinned down by Alexander’s bombardment. Even Meade was affected by the artillery—the Leister house was a victim of frequent overshots, and he had to evacuate with his staff to Powers Hill.

The day was hot, 87 °F (31 °C) by one account, and humid, and the Confederates suffered under the hot sun and from the Union counter-battery fire as they awaited the order to advance. When Union cannonners overshot their targets, they often hit the massed infantry waiting in the woods of Seminary Ridge or in the shallow depressions just behind Alexander’s guns, causing significant casualties before the charge began.

Longstreet had opposed the charge from the beginning, convinced the charge would fail (which ultimately proved true), and had his own plan that he would have preferred for a strategic movement around the Union left flank. He claimed to have told Lee:

> General, I have been a soldier all my life. I have been with soldiers engaged in fights by couples, by squads, companies, regiments, divisions, and armies, and should know, as well as any one, what soldiers can do. It is my opinion that no fifteen thousand men ever arrayed for battle can take that position.

Longstreet wanted to avoid personally ordering the charge by attempting to pass the mantle onto young Colonel Alexander, telling him that he should inform Pickett at the optimum time to begin the advance, based on his assessment that the Union artillery had been effectively silenced. Although he had insufficient information to accomplish this, Alexander eventually notified Pickett that he was running dangerously short of ammunition, sending the message "If you are coming at all, come at once, or I cannot give you proper support, but the enemy's fire has not slackened at all. At least eighteen guns are still firing from the cemetery itself." Pickett asked Longstreet, "General, shall I advance?" Longstreet recalled in his memoirs, "The effort to speak the order failed, and I could only indicate it by an affirmative bow."

Longstreet made one final attempt to call off the assault. After his encounter with Pickett, he discussed the artillery situation with Alexander, and was informed that Alexander did not have full confidence that all the enemy’s guns were silenced and then told the young colonel that the Confederate ammunition was almost exhausted. Longstreet ordered Alexander to step Pickett, but the young colonel explained that replenishing his ammunition from the trains in the rear would take over an hour, and this delay would nullify any advantage the previous barrage had brought. The Longstreet's infantry assault went forward without the Confederate artillery close support that had been originally planned.

### Infantry assault

The entire force that stepped off toward the Union positions at about 2 p.m. consisted of about 12,500 men. Although the attack is popularly called a “charge,” the men marched deliberately in line, to speed up and then charge only when they were within a few hundred yards of the enemy. The line consisted of Pettigrew’s division of two brigades followed Pettigrew’s, but made poor progress. Confusing orders from Trimble caused Lane to send only three and a half of his North Carolina regiments.

Confederate leaders also took casualties, but Hays encouraged his men by riding back and forth just behind the battle line, shouting “Hurrah! Boys, we’re giving them hell!”. Two horses were shot out from under him. Historian Stephen W. Sears calls Hays’ performance “inspiring.”

The Confederates encountered heavy artillery fire while advancing nearly three quarters of a mile across open fields to reach the Union line and were slowed by fences in their path. Initially sloping down, the terrain changed to a gentle upward incline approximately midway between the lines. These obstacles played a large role in the increasing number of casualties the advancing Confederates faced. The ground between Seminary Ridge and Cemetery Ridge is slightly undulating, and the advancing troops periodically disappeared from view of the Union cannonners. As the Confederate divisions advanced, awaiting Union soldiers began shouting “Fredericksburg! Fredericksburg! Fredericksburg!” in reference to the disastrous Union advance on the Confederate line during the 1862 Battle of Fredericksburg. Fire from Lt. Col. Freeman McGilvery’s concealed artillery positions north of Little Round Top raked the Confederate right flank, while the artillery fire from Cemetery Hill hit the left. Shell and solid shot in the beginning turned to canister and musket fire as the Confederates came within 400 yards of the Union line. The mile-long front shrank to less than half a mile (800 m) as the men filled in gaps that appeared throughout the line and followed the natural tendency to move away from the flanking fire.

On the left flank of the attack, Brockenbrough’s brigade was devastated by artillery fire from Cemetery Hill. They were also subjected to a surprise musket fusillade by the 8th Ohio Infantry regiment. The 160 Georgians, firing from a line, so surprised Brockenbrough’s Virginians—already demoralized by their losses to artillery fire—that they panicked and fled back to Seminary Ridge, crashing through Trimble’s division and causing many of his men to bolt as well. The Ohioans followed up with a successful flanking attack on Davis’s brigade of Mississippian and North Carolinians, which was now the left flank of Pettigrew’s division. The survivors were subjected to increasing artillery fire from Cemetery Hill. More than 1,600 rounds were fired at Pettigrew’s men during the assault. This portion of the assault never advanced much farther than the sturdy fence at the Emmitsburg road—that they panicked and fled back to Seminary Ridge, crashing through Trimble’s division and causing many of his men to bolt as well. The Ohioans followed up with a successful flanking attack on Davis’s brigade of Mississippian and North Carolinians, which was now the left flank of Pettigrew’s division. The survivors were subjected to increasing artillery fire from Cemetery Hill.
As Pickett's men advanced, they withstood the defensive fire of first Stannard's brigade, then Harrow's, and then Hall's, before approaching a minor salient in the Union center, a low stone wall taking an 80-yard right-angle turn known afterward as "The Angle". It was defended by Brig. Gen. Paul Philippoteaux's 5th U.S. Artillery Battery A, 4th U.S. Artillery, and 71st Pennsylvania regiments of his brigade to defend the fence and the guns. The two guns and 940 men could not match the massive firepower that Hays' division, to their right, had been able to unleash.

Two gaps opened up in the Union line: the commander of the 71st Pennsylvania ordered his men to retreat when the Confederates came too close to the Angle; south of the copse of trees, the men of the 59th New York (Hall's brigade) inexplicably bolted for the rear. In the latter case, this left Captain Andrew Cowan and his 1st New York Independent Artillery Battery to face the oncoming infantry. Assisted personally by artillery chief Henry Hunt, Cowan ordered five guns to fire double canister simultaneously. The entire Confederate line to his front disappeared. The gap vacated by most of the 71st Pennsylvania, however, was more serious, leaving only a handful of the 71st, 269 men of the 69th Pennsylvania, and Cushing's two 3-inch rifled guns to receive the 2,500 to 3,000 Pennsylvania of Garnett's and Armistead's brigades as they began to cross the stone fence. The Irishmen of the 69th Pennsylvania resisted fiercely in a melee of rifle fire, bayonets, and fists. Garnett, mortified that the 71st had retreated, attempted to bring the 72nd Pennsylvania (a Zouave regiment) forward, but for some reason he did not obey the order, so he had to bring other regiments in to help fill the gap. During the fight, Lt. Charles W. Cushing was killed as he shouted to his men, three bullets striking him, the third in his mouth. The Confederates seized his two guns and turned them to face the Union troops, but they had no ammunition to fire. As more Union reinforcements arrived and charged into the breach, the defensive line became impregnable and the Confederates began to slip away individually, with no senior officers remaining to call a formal retreat.

The infantry assault lasted less than an hour. The supporting attack by Wilcox and Lang on Pickett's right was never a factor; they did not approach the Union line until after Pickett was defeated, and their advance was quickly broken up by McGilvery's guns and by the Vermont Brigade.

Aftermath

While the Union lost about 1,500 killed and wounded, the Confederate casualty rate was over 50%. Pickett's division suffered 2,655 casualties (498 killed, 643 wounded, 833 wounded and captured, and 681 captured, unwounded). Pettigrew's losses are estimated to be about 2,700 (470 killed, 1,893 wounded, 337 captured). Trimble's two brigades lost 885 (155 killed, 650 wounded, and 80 captured). Wilcox's brigade reported losses of 200, Lang's about 400. Thus, total losses during the attack were 6,555, of which at least 1,123 Confederates were killed on the battlefield, 4,019 were wounded, and a good number of the injured were also captured. Confederate prisoner totals are difficult to estimate from their reports; Union reports indicated that 3,750 men were captured.

The casualties were also high among the commanders of the charge. Trimble and Pettigrew were the most senior casualties of the day; Trimble lost a leg, and Pettigrew received a minor wound to the hand (only to die from a bullet to the abdomen suffered in a minor skirmish during the retreat to Virginia). In Pickett's division, 26 of the 36 field grade officers (majors, lieutenant colonels, and colonels) were casualties--12 killed or mortally wounded, nine wounded, four wounded and captured, and one captured. All of his brigade commanders fell: Kemper was wounded seriously, captured by Union soldiers, rescued, and then captured again during the retreat to Virginia; Garnett and Armistead were killed. Garnett had a previous leg injury and rode his horse during the charge, despite knowing that conspicuously riding a horse into heavy enemy fire would mean almost certain death. Armistead, known for leading his brigade with his cap on the tip of his sword, made the farthest progress through the Union lines. He was mortally wounded, falling near "The Angle" at what is now called the High Water Mark of the Confederacy and died two days later in a Union hospital. Ironically, the Union troops that fatally wounded Armistead were under the command of his old friend, Winfield S. Hancock, who was himself severely wounded in the battle. Hancock, delivered Armistead's Bible and other personal effects to his wife, Almira. Of the 15 regimental commanders in Pickett's division, the Virginia Military Institute produced 11 and all were casualties–six killed, five wounded.

Stuart's cavalry action in indirect support of the infantry assault was unsuccessful. He was met and stopped by Union cavalry under the command of Maj. Gen. David McM. Gregg about three miles (5 km) to the east, in East Cavalry Field.

As soldiers struggled back to the Confederate lines along Seminary Ridge, Lee feared a Union counteroffensive and tried to rally his center, telling returning soldiers and Wilcox that the failure was "all my fault. Pickett was insensible for the rest of the day and never forgave Lee for ordering the charge. When Lee told Pickett to rally his division for the defense, Pickett allegedly replied, "General, I have no division."

The Union counteroffensive never came; the Army of the Potomac was exhausted and nearly as damaged at the end of the three days as the Army of Northern Virginia. Meade was content to hold the field. On July 4, the armies observed an informal truce and collected their dead and wounded. Meanwhile, Maj. Gen. Ulysses S. Grant accepted the surrender of the Vicksburg garrison along the Mississippi River, splitting the Confederacy in two. These two Union victories are generally considered the High Water Mark of the Confederacy and the turning point of the Civil War.

History may never know the true story of Lee's intentions at Gettysburg. He never published memoirs, and his after-action report from the battle was cursory. Most of the senior commanders of the charge were casualties and did not write reports. Pickett's report was apparently so bitter that Lee ordered him to destroy it, and no copy has been found.

The controversy over Lee's plans and his officers' implementation of them have led historians to question whether the charge could have succeeded if done differently. One study used a Lanchester model to examine several alternative scenarios and their outcomes. The results suggest that Lee could have captured a foothold on Cemetery Ridge if he had committed several more infantry brigades to the charge; but this likely would have left him with insufficient reserves to hold or exploit the position.

Virginia newspapers praised Pickett's Virginia division as making the most progress during the charge, and the papers used Pickett's comparative success as a means of criticizing the actions of the other states' troops during the charge. It was this publicity that played a significant factor in selecting the name Pickett's Charge. Pickett's military career was never the same after the charge, and he was displeased about having his name attached to the repulsed charge. In particular North Carolinians have long taken exception to the characterizations and portrayal of the poor performance of Brockenhourh's Virginians in the advance as a major causative factor of failure. Some historians have questioned the primacy of Pickett's role in the battle. W. R. Bond wrote in 1888, "No body of troops during the last war made as much reputation on so little fighting."

Additional controversy developed after the battle about Pickett's personal location during the charge. The fact that fifteen of his officers and all three of his brigadier generals were casualties due to the poor performance of Brockenbrough's Virginians in the advance as a major causative factor of failure. The controversy over Lee's plans and his officers' implementation of them have led historians to question whether the charge could have succeeded if done differently.

For every Southern boy fourteen years old, not once but whenever he wants it, there is the instant when it's still not yet two o'clock on that July afternoon; the Confederates were in position behind the rail fence, the guns are laid and ready in the woods and the fueled flags are already loosened to open out and Pickett himself with his long oiled ringlets and his hat in one hand probably and his sword in the other looking up the hill waiting for Longstreet to give the word and it's all in the balance, it hasn't happened yet, it hasn't even begun yet but there is still time for it to not begin again and to what those circumstances which made more men than Garnett and Kemper and Armistead and Wilcox look void yet it's going to begin, we all know that, we have come too far with too much at stake and that moment doesn't need even a fourteen-year-old boy to think This time. Maybe this time with all this much to lose than all this much to gain: Pennsylvania, Maryland, the world, the golden dome of Washington itself to crown with desperate and unbelievable victory the desperate gamble, the cast made two years ago.

-- William Faulkner, Intruder in the Dust

The battlefield today

The site of Pickett's Charge is one of the best-maintained portions of the Gettysburg Battlefield. Despite millions of annual visitors to Gettysburg National Military Park, very few have walked in the footsteps of Pickett's division. The National Park Service maintains a neat, mowed path alongside a fence that leads from a monument on West Confederate Avenue (Seminary Ridge) due east to the Emmitsburg Road in the direction of the Copse of Tress. Pickett's division, however, started considerably south of that point, near the Spangler farm, and wheeled to the north after crossing the road. In fact, the Park Service pathway stands between the two main thrusts of Longstreet's assault–Trimble's division advanced northward of the current path, while Pickett's division moved from farther south.

A cyclorama painting by the French artist Paul Philippeaut entitled The Battle of Gettysburg, also known as the Gettysburg Cyclorama, depicts Pickett's Charge from the vantage point of the stone fence. The Irishmen of the 69th Pennsylvania resisted fiercely in a melee of rifle fire, bayonets, and fists. Garnett, mortified that the 71st had retreated, attempted to bring the 72nd Pennsylvania (a Zouave regiment) forward, but for some reason he did not obey the order, so he had to bring other regiments in to help fill the gap. During the fight, Lt. Charles W. Cushing was killed as he shouted to his men, three bullets striking him, the third in his mouth. The Confederates seized his two guns and turned them to face the Union troops, but they had no ammunition to fire.
