Résumé
The building's materials and construction, weather, stability of the foundations, past wear and current use are all factors to consider in evaluating a building's condition. A plan for maintenance should be formulated with a survey outline, breakdown of housekeeping time estimates, and a schedule of maintenance and periodic inspection. -- AATA

Abstract
Should history stand in the way of progress? Maintenance old buildings are for being historical building. In a country old buildings are as a form appreciation government to historic. And then, as a historically valuable knowledge have deserved to be on hold. History cannot be erased, and any history always a leave track that is very interesting to know. Could we keep it or even destroy it? Government protected old buildings as part of nation's history. All country in the world certainly has different history as an outing symbol of civilization. To identify the civilization of a country it can be recognized from historical buildings. If we visit to other country are the most interesting when we see closely the historical buildings. Building Materials for Historic Buildings. Maintenance and Repair of Older Buildings. Maintenance Plans for Older Buildings. Practical Building Conservation Series. Principles of Repair for Historic Buildings. Managing Vacant Historic Buildings. Historic England’s Conservation Principles defines restoration as returning a building to “a known earlier state, on the basis of compelling evidence, without conjecture”. A number of criteria are set out which normally make restoration acceptable. These criteria include This volume, Conservation Basics, reviews the history and evolution of building conservation in England, explaining the philosophical and legal frameworks that exist today, and considering possible future developments. Learn more. Maintenance and rehabilitation of walls and facades call fora thorough understanding of the forces that cause deterioration.
