Abstract

A critical challenge to Scotland's new system of government is the making and implementation of public policy. This book offers a comprehensive account of the policy process in contemporary Scotland. There is a review of theories of policy-making, focusing on decentralised systems. The author then identifies the key actors and institutions, patterns of policy making, and the extent of convergence and divergence in comparison with England and other devolved territories. Case studies of policy making in health, higher education, housing, criminal justice, social inclusion and economic development allow the reader to see how policy making works in practice. There is an analysis of financial planning and decision making, and an examination of Scotland's role in UK and European policy networks. Comparisons are made with other devolved governments in Europe and beyond. The book is based on extensive research, including interviews with leaders of interest groups, politicians and officials across the Scottish Government and in the Scottish Parliament, an analysis of spending patterns, an examination of the legislative output, and case studies of policy making.

It identifies the key actors and institutions, patterns of policymaking. Free shipping over $10. Book Overview. A critical challenge to Scotland’s new system of government is the making and implementation of public policy. This book offers a comprehensive account of the policy process in contemporary Scotland. Scotland has two governments: the UK government is responsible for matters including, defence, foreign affairs, the economy, social security and the constitution; and the Scottish government is responsible for matters including health, education, justice and policing and local government. Although responsibility is divided in this way, the two governments work together on many issues and cooperate to make sure that the devolution settlement is well managed. The division of responsibilities is not fixed, and it has changed several times since devolution began in 1999. The Scotland Act provides UK ministers with a series of order making powers to manage the devolution settlement.
