Summary of geology of the Stirling and Perth area

Excursion 1: Stirling: building stones

Excursion 2: Bannock Burn

Excursion 3: Falkirk

Excursion 4: Muiravonside Country Park

Excursion 5: Bridge of Allan and Dumyat

Excursion 6: Silver Glen, Alva

Excursion 7: Mill Glen, Tillicoultry

Excursion 8: Teith valley and Strathallan

Excursion 9: Gargunnock Burn

Excursion 10: Fintry

Excursion 11: Kilsyth and Denny

Excursion 12: Braeleny, Keltie Water

Excursion 13: Bracklinn Falls, Keltie Water

Excursion 14: Craig Rossie

Excursion 15: Perth

Excursion 16: Perth: building stones

Excursion 17: Stanley and Campsie Linn

Excursion 18: Dunkeld and Little Glen Shee

- Matt Armstrong (deceased, formerly BGS)
Acknowledgements

All the maps have been drafted by Angus Miller of Geowalks (Edinburgh). All photographs are by the editors. We wish to thank those geologists who kindly undertook to review individual excursions. The Edinburgh Geological Society made a grant available for the drawing of the excursion maps. David Stephenson and Kathryn Goodenough are thanked for their editorial contributions. We would like to express particular thanks to David Stephenson for his meticulous editing.

Editorial introduction

This field guide has had a long history since the idea was mooted in the 1970s, and many of the excursions had been drafted by the end of the 1980s. We have taken the opportunity when editing the text and revisiting all the exposures to remove out-of-date references and add the most-recent research results and concepts. Some localities had degraded to the extent that we could not justify retaining them in the guide. In addition, we were obliged to remove some excursions entirely, as a result of restrictions on the overall size of the book. All national grid references are based on GPS readings taken at the time of our visits. Since this is a field guide, readers wishing to have overviews of the geology and landscapes are referred to the following works: Cameron & Stephenson (1985), Browne & Mendum (1995), Trewin (2002), McKirdy et al. (2009), Friend (2012), Gillen (2013). The Stirling Memoir (Francis et al., 1970) and the Perth Memoir (Armstrong et al., 1985) are key references for most of the more detailed geology and are referred to separately only in chapters where there is a specific reason.

The Edinburgh Geological Society (EGS) was founded in 1834 in Edinburgh, Scotland, with the aim of stimulating public interest in geology and the advancement of geological thinking, from Darwin's theories of evolution to the modern ideas on plate tectonics. The Society still seeks to stimulate public interest and offers a range of facilities to members including lectures, excursions, publications and the maintenance of a geological library.

Edinburgh Geological Society on WN Network delivers the latest Videos and Editable pages for News & Events, including Entertainment, Music, Sports, Science and more, Sign up and share your playlists. Throughout its 170-year history, the Society has seen major changes in geological thinking, from Darwin's theories of evolution to the modern ideas on plate tectonics. The Society still seeks to stimulate public interest and offers a range of facilities to members including lectures, excursions, publications and the maintenance of a geological library. The Society was founded in 1834 by eleven students from the department of Geology and Mineralogy of Queen's College, Edinburgh. Book your bus ticket to Stirling from Edinburgh today. Duration 1 hours 22 minutes (fastest time). Departures Up to 10 services per day. Our route M909 bus stops at 3 stops between Edinburgh and Stirling. The bus sets off from Bus Station and drops you off at Goosecroft Rd Bus Station. Edinburgh. Stirling. Goosecroft Road Bus Station - The megabus stop is situated within the Goosecroft Rd Bus Station close to the City centre. Stance 1 is used for Glasgow bound service and Stance 2 for Northbound services. megabus experience. Never been on one of our buses? Well now you can experience what we have to offer from the comfort of your own home. Check out the megabus experience with our amazing videos and 3D tours. Frequently The Edinburgh Geological Society (EGS) was founded in 1834 in Edinburgh, Scotland, with the aim of stimulating public interest in geology and the advancement of geological
knowledge. It was a time of debate and controversy surrounding the emerging science of geology and Edinburgh was one of the centres of this debate, which is why the Society is among the oldest of the Scottish scientific societies. Throughout its 170-year history, the Society has seen major changes in geological thinking, from Darwin's theories of evolution to the modern ideas on plate tectonics. The Society still seeks
