Culture: Central Mexico Postclassic (NU93)

Subjects: Culture summary (105); Acculturation and culture contact (177); Sociocultural trends (178); Structures (340); Production and supply (433);

Abstract: Diehl writes, 'This book is about the ancient Toltecs and their capital of Tula in central Mexico…. [I]t is more a general synthesis of what we know about the Toltecs than a specifically project-oriented work…. [O]ur project was a very broadly conceived attempt to study many facets of Toltec life and the very nature of the results require a broad perspective. …[A]nd I wanted to provide a book for the general public as well as my professional colleagues.' (page 10). 'The UMC [(University of Missouri-Columbia)] Tula Archaeological Project was a decade-long research program designed to study Toltec life and culture at Tula. This book is a semi-final report and interpretation of the project results…' (page 11). Diehl provides an overview of the Toltecs and compares them to the Aztec and contemporary cultures, looking especially at Toltec contacts throughout Mesoamerica and northern Mexico. His archaeological findings are described, especially the architecture, along with the Toltec economy and their collapse.

Document Number: 2

Document ID: nu93-002

Document Type: Monograph

Language: English

Evaluation: Archaeologist-4, 5

Analyst: Sarah Berry; 2008

Coverage Date: 1100 BP-479 BP (900 AD-1521 AD)

Coverage Place: Tula, Mexico

LCSH: Toltecs/ Tula de Allende (Mexico)--Antiquities/Tula Site (Tula de Allende, Mexico) Mexico--Antiquities

The Toltecs at Tula use an extensive canal system for irrigation and have hillside terraced agriculture, usually a sign of poor land for farming. Why do they abandon their city around 800 AD? Are there problems with salinity from the irrigation system? Is there drought? The researchers suggest there may have been too much diversity (162), based on a legend of Quetzalcoatl being forced to flee and take his followers. They fled to the east and crossed the Gulf of Mexico in reed boats. This legend coincides with the downfall of Tula Chico. Very interesting: photo #72 shows a very steep sided, tru Tula: The Toltec Capital of Ancient Mexico. Richard A. Diehl. Thames and Hudson, New York, 1983. Recommend this journal. Email your librarian or administrator to recommend adding this journal to your organisation's collection. Tula has 2 ratings and 0 reviews.
