Goodman and Gilman's
The Pharmacological Basis of Therapeutics

EDITED BY L. S. GOODMAN, A. G. GILMAN, T. W. RALL AND F. MURAD

* New edition to be published September 1985
* Fully updated
* An essential text and reference work

The seventh edition of this world-renowned textbook of pharmacology, toxicology and therapeutics has undergone a thorough updating of every chapter in respect of the mechanism of action and rational use of older therapeutic agents and the addition of important new drug entities. However, readers of previous editions will find the same good organisation, clarity of writing and authority that have made ‘Goodman and Gilman’ the standard book in the field.

**Some of the new material in this edition**
Critical discussion of important new drug entities – New antihypertensive agents; Antiinflammatory agents; Drugs for ulcer therapy; Antidepressants; Antifungal agents; Antiviral agents; Immunosuppressive agents; Digitalis substitutes; Antiarrhythmic agents; Second-generation sulfonylureas; Neuromuscular blocking agents and anaesthetics; Agents for dissolution of gallstones; New opioid agonists and long-acting antagonists.
New approaches to important therapeutic problems – Proton pump inhibitors, HMG CoA reductase inhibitors, Recombinant DNA technology for production of human proteins and Streptokinase.
A thoroughly revised section on antibiotics including a summary table on “Current Use of Antimicrobial Agents in the Therapy of Infections”; Discussion of new antimicrobial agents.
Extensive revision of sections on: Calcium channel blockers; Benzodiazepines; Drug treatment of hyperlipoproteinemias; Chemotherapy of parasitic diseases; Treatment of psychiatric disorders; Neuroactive peptides; Antiproliferative agents; Prostaglandins and related autacoids; Endorphins, enkephalins and the effects of therapeutic agents; A greatly expanded appendix on pharmacokinetics and an expanded discussion of pharamacodynamics; Thorough discussion of drug interactions and their prevention; Extensive bibliographies.

The Royal Society of Medicine
Video Library of Surgery and Medicine

In association with the Royal College of Surgeons of England

- All videotapes produced under the direct supervision of The Royal Society of Medicine.
- Topics selected by an Editorial Board who combine expertise in surgery and medicine with substantial teaching experience.
- All surgical videos endorsed by the Royal College of Surgeons of England, assuring the educational soundness of content and approach.
- Demonstrations are by senior practitioners whose expertise is not widely available to students.
- Programmes concentrate on principles and procedures.
- Practitioners discuss potential problems and their solutions.
- Practitioners demonstrate techniques and suggest alternatives.
- Advanced camera techniques used for surgical programmes to give a substantially better view than a theatre observer can normally obtain — often even better than the view of the surgeon.

- Broadcast quality technical standards used throughout to give exceptional visual clarity.
- Full range of video formats available.

Editorial Board:
Chairman:
Sir John Stallworthy, FRCOG, FRCS.
Emeritus Nuffield Professor of Obstetrics and Gynaecology, University of Oxford.
Editor in Chief:
Roger Greenhalgh, MA, MD, M.Chir, FRCS.
Professor of Surgery, Charing Cross Hospital, London.
Harold Ellis, MCL, FRCS.
Professor of Surgery, Westminster Medical School.
Dr. Andrew Raffe, OBE, MD, FRCP
Lately Chief Medical Officer, London Transport.
Derek Willoughby, FRCPath.
Professor of Experimental Pathology, St. Bartholomew's Medical College.

Clinical and Experimental Pharmacology & Physiology

Executive Editors
M.J. Rand, A.E. Doyle, J.P. Coghl an and J.P. Chalmers

This journal provides a medium for the rapid publication of original research papers and short communications on the results of clinical and experimental work in pharmacology and physiology, and includes critical comments, together with replies by the original authors of papers which appeared in earlier issues. The journal aims to make a substantial contribution to effective and productive communication between scientists throughout the world who are working in these interrelated disciplines.

Clinical and Experimental Pharmacology and Physiology has been adopted as their official publication by the Australian Society for Medical Research, the Australasian Society of Clinical and Experimental Pharmacologists, and The High Blood Pressure Research Council of Australia.

Manuscripts for publication should be sent to the Editor-in-Chief, Professor M.J. Rand, Department of Pharmacology, University of Melbourne, Parkville 3052, Victoria, Australia.

Subscription Information
Clinical and Experimental Pharmacology and Physiology is published monthly. Subscription rates for 1986 are £156.00 (UK & overseas), US$220.00 (USA & Canada), AU$230.00 (Australasia) post free.

Course on Pharmacoepidemiology

One week full-time course from 7th to 11th July 1986.

The course reviews the statistical and epidemiological basis for studies on adverse drug reaction monitoring and population studies of drug utilization and efficacy.

Recent advances in randomised controlled trial design will be discussed together with measurements of quality of life and cost-effectiveness in such experiments.

Faculty will include: C.J. Bulpitt, M. Drummond, M.J.R. Healy, W. Inman, H. Jick, G. Rose and M.D.B. Stephens.

The course is particularly suitable for workers either in academic departments, departments of pharmacy or in the pharmaceutical industry.

Fees are £390. Numbers limited – candidates should apply by 19 May 1986.

Further information and application forms are available from:

The Registrar
London School of Hygiene and Tropical Medicine
Keppel Street
LONDON WC1E 7HT

SUBSCRIPTION PROBLEMS?

Most subscription problems are actually a need for information. It is hoped that the following will answer any questions you may have.

1. Please attach a current mailing label when sending an enquiry about your journal subscription (or at least the exact name and address to which the journal is sent).

2. All subscriptions are available on current volume basis only. If you send a subscription order in the middle of the year, issues already published in that year’s volume will be mailed to you automatically.

3. A subscription renewal notice will be sent to you approximately three months prior to expiry. Prompt renewal ensures an uninterrupted supply of your journal issues.

4. If you wish to notify us of a change of address, it is most important that you send a copy of your most recent mailing label AND your new address. Please allow 6–8 weeks for processing of your address change. Please send this information to:

Macmillan Journals
Farndon Road
Market Harborough
Leicestershire
LE16 9NR, UK.

Our objective is to provide the best possible service to you. Following the above procedures will enable us to do this. Your assistance will be appreciated.
ENCyclopedia of Medical History

by Roderick McGrew

The Encyclopedia of Medical History is the first general reference book on the history of medicine for decades. This book traces the histories of physiology, neurology, gynaecology, surgery, psychology, radiology and other areas of specialisation from their earliest beginnings to the present day.

Professor McGrew, in describing specific diseases, discusses the consequences of the diseases on social groups and structure in relation to public health, institutional development and economic growth. Also covered in detail are: human psychotherapy, bacteriology, instruments, medications, procedures, concepts, popular medicine, schools, hospitals and clinics and public health.

THE DEVELOPMENT OF A MEDICINE

by R. B. Smith

There is increasing public interest in the development and testing of medicines, following notable cases of drugs being withdrawn because of harmful side-effects. The Development of a Medicine places the discovery and development of medicines in its historical context and then explains the extremely complex and lengthy process by which a drug or medicine is developed from the laboratory bench to availability for prescription by the physician.

This is a highly readable account of an area which is of vital interest to the medical profession and the public alike.

DECISION MAKING IN GENERAL PRACTICE

Edited by Michael Sheldon, Department of Community Health, Queen’s Medical Centre, Nottingham, John Brooke, Digital Equipment Company, Reading and Alan Rector, Medical Computation Unit, Manchester Royal Infirmary.

The book is based on a workshop held at Queen’s Medical Centre, Nottingham and considers the problems of decision-making in the consultation as applied to general practice. The main areas of focus are: (i) needs of the undergraduate and vocational training in general practice for the future; and (ii) the introduction of computers into the consultation with reference to expert systems and decision support systems.

Decision Making in General Practice will be of value to instructors and educationalists in general practice as well as to all GPs, particularly those interested in computers in general practice.

The contents cover: The Consultation; Models of Decision Making; Diagnosis; Management in the Consultation, Experience and Current Research; Methodology for Studying Decision Making Process; Implications for Education, Decision Support Systems and General Practice.

JOURNALS FROM MACMILLAN

☐ PHARMACEUTICAL MEDICINE
Quarterly
Editor: R. N. Smith.
Assistant Editor: P. J. Keen
... "a quarterly journal, which includes papers on the validation of new and established methods of testing drugs in man written by investigators both inside and outside the pharmaceutical industry. It also provides a forum for the exchange of ideas about issues affecting drug development. These new developments merit support from all involved in the management, sale and use of drugs."
Lancet

☐ POSTGRADUATE MEDICAL JOURNAL
Monthly
Journal of the Fellowship of Postgraduate Medicine
Editor: B. I. Hoffbrand
A monthly compendium of current clinical research and practice invaluable to the graduate in training.

☐ HUMAN TOXICOLOGY
Bi-monthly
Secretary to the Editorial Board: P. Turner
Covers all aspects of human toxicology embracing both animal research with particular relevance to man and studies with humans.

☐ PUBLIC HEALTH
Journal of the Society of Community Medicine
Editor: J. S. Robertson
From the beginning of 1986 Macmillan will be publishing Public Health. Now in its 100th volume, the journal publishes studies in preventive and social medicine and all aspects of public health and particularly welcomes reports of original epidemiological studies.

☐ BRITISH JOURNAL OF PHARMACOLOGY
Monthly
The Journal of the British Pharmacological Society
Chairman: J. F. Mitchell
Secretary to the Editorial Board: G. M. Lees
One of the top five most cited pharmacology journals in the world.
A vital source of relevant information for physiologists, immunologists, molecular biologists.

Generally, eutectic interaction does not impact the pharmacological activity, but may contribute in alteration of the pharmaceutical properties. Unintentional eutectic formation in tableted dosage form development have been reported to lead to unwanted changes in the physical and/or chemical characteristics of the tablets [2]. Ibuprofen is a kind of drug that forms eutectic with some kind of excipients as reported in many studies [7, 11, 1]. It has been identified by DSC analysis that ibuprofen forms eutectic with stearic acid.
