A manual of biological anthropology

INDERA P. SINGH and M.K. BHASIN (University of Delhi, Delhi, India)
Pages: 560 + Figures • ISBN 81-85264-34-1 • Size: 180 × 240 mm • Binding: Hard • Price: US$ 100/- Rs. 1950/-

"It is in every respect an up-to-date handbook of all the various methods, which have to be applied in all the fields of Biological Anthropology ........."
- Prof. Dr. Dr.h.c. H. Walter, Editor-in-Chief, Anthropologischer Anzeiger, Hameln, Germany

"This is a very valuable contribution to biological anthropologists everywhere........."
- Dr. Kenneth A. R. Kennedy, Professor of Ecology and Evolutionary Biology, Anthropology, Asian Studies & Board Certified Forensic Anthropologist (D.A.B.F.A.), Cornell University, Ithaca, USA

"This manual is going to be an invaluable companion to the any anthropologist. There are no other competitor manuals or textbooks, because the manual has been created specifically to address knowledge, skills, and activity objectives that must be mastered by any one who takes up the anthropology course."
- Prof. Dr. S. K. Verma, Department Physiotherapy & Sports Science, Punjabi University, Patiala, India

"In a nutshell it can be said that the Manual of Biological Anthropology is well conceived of, contains vast information on the subject, is precisely put into meaningful chapters, is a treasure house of knowledge and a must for an inquisitive scholar of anthropology."
- Prof. Dr. S. P. Singh, Department Human Biology, Punjabi University, Patiala, India

"The authors have used their outstanding expertise and long experience in bringing out this manual which will be used for many decades by the students and research workers in the relevant areas of life sciences."
- Prof. Dr. Mohammad Fahim, Vallabhbhai Patel Chest Institute, University of Delhi, India

"It is an excellent and most extensive manual which each scholar/institute in the field of Biological Anthropology must possess."
- Prof. Dr. Indu Talwar, Department of Anthropology, Punjab University, Chandigarh, India

"The admirable anthology covering diverse methods of Anthropology, Life Sciences and Medicine is the exquisiteness of this book. The students and the scholars of Anthropology, Life Sciences and Medicine will find it a useful and enriching text of knowledge."
Prof. Dr. S. L. Malik, Department of Anthropology, University of Delhi, India

"This volume would be of mammoth significance to the researchers, post graduates, graduates and teachers! of Biological/Physical Anthropology .........It would turn out to be one of the most referred books in the Libraries of various Universities and other Research Organizations."
Prof. Dr. Suriender Nath, Department of Anthropology, University of Delhi, India

"A Practical Manual dealing with such diverse fields can only be the result a dedicated commitment of the authors to make it easier for the readers to understand the nuances of various techniques in the field of Anthropology and Forensic Science."
Prof. Dr. A. K. Kalla, Department of Anthropology, University of Delhi, India

Biological anthropology can be defined as the scientific study of nature-nature relationship, although each element of this interaction, i.e., nature and nurture, can be holistically studied in themselves. Thus there is a genetic study of a morphological, anatomical or ontological traits, patterns, and relationships. A Biological Anthropology Tutorial. Copyright © 1999-2013 by Dennis O'Neil. All rights reserved. Lecture: what is biological anthropology, what is a biological study of life in its evolutionary historical questions historical science each. A class of objects, the source of which may be genetic or environmental or both in interaction i; Central to all anthropological subfields i; the living world belongs within it; the many questions, issues, and events within a forensic anthropology: the application of anthropological knowledge to solving offences committed against people, including homicide and war crimes Multidisciplinary: an investigative approach that brings the expertise of the biological profile of a Mendelian group, the applied dimensions of biological anthropology determine the pathogenic characters of a population, suggesting viable and concrete programmes for their alleviation. The present manual consists of osteology, anthropometry (corticalometry, osteometry, somatometry), somatometry, dental, physiology, nutrition, dermatoglyphics, and demography. Each techniques, its execution and other related aspects have been described in detail. The manual contains a chapter on statistics which describes how data are to be statistically treated and infere.
CONTENTS

Preface
Acknowledgements

1. INTRODUCTION
  1.1. INTRODUCTION

2. ANTHROPOMETRY
  2.1. INTRODUCTION
  2.1. INSTRUMENTS

3. OSTEOLGY
  3.1. INTRODUCTION
  3.2. TYPES OF BONE
  3.3. CHARACTERISTICS OF BONE
  3.4. NAME OF BONE
    3.4.1. Axial Skeleton
      3.4.1.1. Skull
      3.4.1.2. Vertebrae
      3.4.1.3. Sternum
      3.4.1.4. Ribs
    3.4.2. Appendicular Skeleton
      3.4.2.1. Upper Limbs
      3.4.2.2. Lower Limbs
  3.5. DETERMINATION OF SEX
  3.6. TABLE OF BONES

4. OSTEOMETRY
  4.1. STERNUM
    4.1.1. Measurements
    4.1.2. Indices
  4.2. RIBS
    4.2.1. Measurements
    4.2.2. Indices
  4.3. THORAX AS A WHOLE
  4.4. VERTEBRAE
    4.4.1. Measurements
    4.4.2. Angles
    4.4.3. Indices
  4.5. CLAVICLE
    4.5.1. Measurements
    4.5.2. Angles
    4.5.3. Indices
  4.6. SCAPULA
    4.6.1. Measurements
    4.6.2. Angles
    4.6.3. Indices
  4.7. HUMERUS
    4.7.1. Measurements
    4.7.2. Angles
    4.7.3. Indices
  4.8. RADIUS
    4.8.1. Measurements
    4.8.2. Angles
    4.8.3. Indices
  4.9. ULNA
    4.9.1. Measurements
    4.9.2. Angles
    4.9.3. Indices
  4.10. HAND
    4.10.1. Measurements
    4.10-A. Navicular or Scaphoid Bone
      4.10-A (1) Measurements
      4.10-A (2) Indices
    4.10-B. Lunate Bone
      4.10-B (1) Measurements
      4.10-B (2) Angles
      4.10-B (3) Indices
    4.10-C. Triquetral Bone
      4.10-C (1) Measurements
      4.10-C (2) Indices
    4.10-D. Pisiform Bone
      4.10-D (1) Measurements
      4.10-D (2) Angles
      4.10-D (3) Indices
    4.10-E. Trapezium Bone
      4.10-E (1) Measurements
      4.10-E (2) Indices
    4.10-F. Trapezoid Bone
      4.10-F (1) Measurements
      4.10-F (2) Indices
    4.10-G. Capitate Bone
      4.10-G (1) Measurements
      4.10-G (2) Indices
    4.10-H. Hamate Bone
      4.10-H (1) Measurements
      4.10-H (2) Angle
      4.10-H (3) Indices
  4.11. PELVIS
    4.11.1. Measurements
    4.11.2. Angles
    4.11.3. Indices
  4.12. SACRUM
    4.12.1. Measurements
    4.12.2. Angles
    4.12.3. Indices
  4.13. FEMUR
    4.13.1. Measurements
    4.13.2. Angles
    4.13.3. Indices
  4.14. PATELLA
    4.14.1. Measurements
    4.14.2. Angles
  4.15. TIBIA
    4.15.1. Measurements
    4.15.2. Angles
    4.15.3. Indices
  4.16. FIBULA
    4.16.1. Measurements
    4.16.2. Angles
    4.16.3. Indices
  4.17. FOOT AS A WHOLE
    4.17-A. Tarsus
      4.17-A (1) Measurements
      4.17-A (2) Indices
    4.17-B. Talus Bone
      4.17-B (1) Measurements
      4.17-B (2) Angles
      4.17-B (3) Indices
    4.17-C. Calcaneous Bone
      4.17-C (1) Measurements
      4.17-C (2) Indices
    4.17-D. Navicular Bone
      4.17-D (1) Measurements
      4.17-D (2) Indices
    4.17-E. Cuneiform Medial I Bone
      4.17-E (1) Measurements
      4.17-E (2) Indices
    4.17-F. Cuneiform Intermedium II and Cuneiform Laterale III Bone
      4.17-F (1) Measurement
      4.17-F (2) Indices
    4.17-G. Cuboid Bone
      4.17-G (1) Measurements
      4.17-G (2) Indices
    4.17-H. Metatarsus
      4.17-H (1) Measurements
      4.17-H (2) Angles
      4.17-H (3) Indices
    4.17-I. Phalanges
      4.17-I (1) Measurements
      4.17-I (2) Indices
  4.18. PROPORION INDICES
  4.19. OSTEOMETRY OF THE POST-CRANIAL SKELETON
  4.20. ESTIMATION OF STATURE FROM BONES OF UPPER AND LOWER EXTREMITIES

5. CRANIOMETRY
5.1. INTRODUCTION
5.2. DETERMINATION OF SEX AND AGE OF SKULL
5.3. AGEING OF SKULL
5.4. CRANIOMETRY TERMS
5.5. CRANIOMETRIC LANDMARKS
5.6. CRANIOMETRIC MEASUREMENTS
5.6.1. Length Measurements on Neurocranium (Brain Cavity)
5.6.2. Breadth Measurements on Neurocranium (Brain Cavity)
5.6.3. Height Measurements on Neurocranium (Brain Cavity)
5.6.4. Circumference, Measurements Arcs and Chords on Neurocranium (Brain Cavity)
5.6.5. Length Measurements on Splanchnocranium (Face)
5.6.6. Breadth Measurements on Splanchnocranium (Face)
5.6.7. Height Measurements on Splanchnocranium (Face)
5.6.8. Measurements on Orbit and Inter-orbital Region
5.6.9. Measurements of Nasal Region
5.6.10. Measurements on Upper Jaw and Palate
5.6.11. Measurements on Lower Jaw or Mandible
5.6.12. Angles on the Face of the Skull
5.6.13. Angles of the Cranium
5.6.14. Volume and Weight of Skull
5.7. CRANIOMETRIC INDICES
5.8. CRANIOGRAPHIC TECHNIQUES
5.8.1. Drawing of Curves
5.8.1.1. Sagittal Curves
5.8.1.2. Frontal Curves
5.8.1.3. Horizontal Curves
5.8.2. Measurements on Craniographs
5.9. CRANIOSCOPIC OBSERVATION
6. SOMATOMETRY
6.1. INTRODUCTION
6.2. SOMATOMETRIC TECHNIQUES
6.3. ASCERTAINMENT OF AGE
6.3.1. Age Grouping
6.4. SOMATOMETRIC LANDMARKS
6.5. SOMATOMETRIC MEASUREMENTS
6.5.1. Projective Height Measurements of the Body in Standing Position
6.5.2. Measurements of Extremities and Span
6.5.3. Measurements on the Dorsal Side
6.5.4. Projective Height in Sitting Position
6.5.5. Linear Measurements of Frontal Trunk and Neck
6.5.6. Breadth and Depth Measurements of Trunk and Waist
6.5.7. Length and Breadth Measurements of the Upper Extremities
6.5.8. Length and Breadth Measurements of Lower Extremities
6.5.9. Girth Measurements of Upper Extremities
6.5.10. Girth Measurements of Lower Extremities
6.5.11. Body Weight and Volume
6.5.12. Skinfold Measurements
6.5.13. Head Measurements - Longitudinal Measurements of Head
6.5.14. Breadth Measurements of Head and Face
6.5.15. Breadth Measurements on Nose and Mouth
6.5.16. Height and Thickness Measurements of Forehead and Face
6.5.17. Height and Thickness Measurements of the Mouth and Chin Region
6.5.18. Measurements on Ear
6.5.19. Angles on Face
6.5.20. Circumference of Girth and Arc Measurements of Head and Face
6.6. SOMATOMETRIC INDICES
6.6.1. Relative Height-Length Proportions
6.6.2. Vertical Horizontal Relationship
6.6.3. Comparisons of Extremities with Each Other
6.6.4. Relative Proportions of Breadths, Thickness and Girths
6.6.5. Height-Weight Indices
6.6.6. Robusticity-Indices
6.6.7. Skinfold Thickness and Weight Indices
6.6.8. Indices of Head and Relationship of Head and Face
6.6.9. Main Proportions of Face
6.6.10. Indices of the Eye-Nose Region
6.6.11. Indices of Ear
6.6.12. Indices of the Mouth-Chin Region
6.6.13. Skinfold Thickness and Weight Indices
6.7. NOMOGRAMS
6.8. SOMATOSCOPIC TECHNIQUES
6.8.1. Body Postures (Standing) after Brown
6.8.2. Neck
6.8.3. Abdomen
6.8.4. Buttock
6.8.5. Upper and Lower Extremities with Hand and Foot
6.8.6. Hand
6.8.7. Fingers
6.8.8. Finger Nails
6.8.9. Foot
6.8.10. Toes
6.8.11. Toe Nails
6.8.12. Skin colour
6.8.12.1. Luschan’s Skin Colur Chart
6.8.12.2. Measurements of Skin Colour by Spectrometry
6.8.13. Hair
6.8.13.1. Hair Colour
6.8.13.2. Hair Form
6.8.13.3. Hair Texture
6.8.13.4. Quantity of Hair
6.8.13.5. Hair Whorls
6.8.13.6. Beard and Moustache
6.8.13.7. Mid-Phalangeal Hair
6.8.14. Head
6.8.14.2. Occiput
6.8.14.3. Total Face
6.8.14.4. Forehead
6.8.14.5. Widow’s Peak
6.8.15. Cheeks
6.8.16. Eyes
6.8.17. Nose
6.8.17.1. Nasal Root
6.8.17.2. Nasal Bridge
6.8.17.3. Tip of Nose
6.8.17.4. Nasal Wings and Alae
6.8.17.5. Nasal Septum
6.8.17.6. Nasal Cavity
6.8.17.7. Surface of Nasal Cavity
6.8.18. Lips
6.8.18.1. Integumental Upper Lip
6.8.18.2. Integumental Lower Lip
6.8.19. Mouth
6.8.20. Teeth
6.8.21. Lip and Chin Furrow
6.8.21.1. Size
6.8.21.2. Profile of Chin
6.8.21.3. Shape and Size of Chin
6.8.21.4. Tongue
6.8.21.5. Tongue Pigmentation
6.8.21.6. Prognathism
6.8.22. External Ear
6.8.23. Puberty Rating
6.8.23.1. Stages of Axillary and Facial Hair Development
6.8.23.2. Age at Menarche
6.8.24. Genitalia
6.8.24.1. Male Genitalia
6.8.24.2. Female External Genitalia
6.8.24.3. Breasts
6.8.24.4. Buttocks and Lumbar Curvature
6.8.25. The Mongolian or Sacral Spot
6.8.26. Behavioural Traits
6.8.26.2. Arm Folding
6.8.26.3. Leg Folding
6.8.26.4. Handedness
6.8.26.5. Tongue Rolling
6.8.26.6. Tongue Folding
6.8.26.7. Tongue Curling
6.9. SKELETAL AGE
6.9.1. Soft-Tissue Measurements from Radiographs
7. RESPIRATORY FUNCTIONS
7.1. INTRODUCTION
7.2. RESPIRATORY OBSERVATIONS
7.3. INSTRUMENT
7.3.1. Vital Capacity (VC) or Forced Vital Capacity (FVC)
8. BODY DENSITY
8.1. INTRODUCTION
8.2. BODY DENSITY ESTIMATION
8.2.1. Water Displacement Techniques 8.2.2. Under Water Weighing Technique
8.3. MEASUREMENT EXTREMITY SEGMENT VOLUMES
8.3.1. Reproducibility

9. SOMATOTYPING
9.1. INTRODUCTION
9.2. ANTHROPOMETRIC MEASUREMENT TECHNIQUE FOR ASSESSING HEATH - CARTER SOMATOTYPE
9.3. HEATH - CARTER SOMATOTYPE RATING FORM
9.4. CALCULATING THE HEATH CARTER ANTHROPOMETRIC SOMATOTYPE
9.5. SOMATOTYPE COMPONENT CALCULATIONS
9.6. SPECIFICATION FOR SOMATOTYPE CATEGORIES
9.7. HEIGHT - WEIGHT RATIO FACTOR TABLE

10. PSYCHOMOTOR TESTS
10.1. Introduction
10.2. Psychomotor Tests
10.2.1. Strength 10.2.1.1. Static Muscular Strength 10.2.1.2. Explosive Muscular Strength
10.2.2. Speed 10.2.2.1. The Dashes 10.2.3. Agility and Co-ordination 10.2.3.1. Flexibility Test
10.2.3.2. The Walking Balance Test 10.2.3.2.A. The Turning Balance Test 10.2.3.3. The Shuttle Run Test 10.2.3.4. The Co-ordination Test 10.2.4. Persistence (per time) 10.2.5. Endurance Test 10.2.5.1. Step Test 10.2.6. Studies of Functional Asymmetry 10.2.6.1. The Hand-clasping Test 10.2.6.2. The Arm-folding Test 10.2.6.3. The Leg-folding Test

11. DENTAL ANTHROPOLOGY
11.1. Introduction
11.2. Dental Examination
11.2.1 Tooth Types and Formula 11.2.1.1. Teeth Types 11.2.1.2. Tooth Formula
11.2.2. Surface of Teeth 11.2.2.3. Primary and Permanent Teeth 11.2.4. Dental Observations 11.2.4.1. Number of Primary and Secondary Teeth 11.2.4.2. Numerical Variations 11.2.4.3. Dental Morphology 11.2.4.4. Mutilations 11.2.4.5. Attrition 11.2.4.6. Metric Measurements
11.3. Preparation of Dental Casts
11.3.1. Apparatus and Chemicals 11.3.2. Method of obtaining Dental Impressions
11.4. Dentine Exposure in Human Tooth Attrition

12. DIET SURVEY
12.1. Introduction
12.2. Nutritional Status
12.2.1. Food Habits 12.2.2. Individual Dietary Intake (Oral Questionnaire) 12.2.2.1. Food Consumption 12.2.2.2. Food Consumption (For Cooked Food) 12.2.2.3. Cooked Food

13. DERMATOGlyphICS
13.1. Introduction
13.2. Methods of Recording Dermatoglyphics
13.3. Dermatoglyphic Pattern Configurations
13.4. Principles of Configurational Arrangement
13.5. Dermatoglyphic Landmarks
13.6. Finger Dermatoglyphics
13.7. Configurations of Middle and Proximal Phalanges
13.8. The Palmar Dermatoglyphics
13.9. Plantar Dermatoglyphics

13.10. Development of Dermal Ridges in the Foetus

13.11. Dermatoglyphic Topology

13.11.1. Topological Classification of Finger-Tip Dermatoglyphics 13.11.2. Topological Description of Palmar and Plantar Dermatoglyphics 13.11.3. Topological Classification of Palmar Dermatoglyphics 13.11.3.1. Loops 13.11.3.2. Triradial 13.11.3.3. Writing of Formula 13.11.3.4. Instructions for Classifying Patterns on the Palm 13.11.3.5. Hypotenar Area 13.11.4. Topological Classification of Plantar Dermatoglyphics 13.11.4.1. Loops 13.11.4.2. Triradial 13.11.4.3. Writing the Formula 13.11.4.4. Instructions for Classifying Patterns on the Distal Half of the Sole 13.11.4.5. Instructions for Classifying Patterns on the Proximal Sole 13.11.5. Dermatoglyphic Dictionary

13.12. Flexion Creases

13.13. Forensic Application

14. ANTHROPO-DEMOGRAPHY

14.1. Introduction

14.2. Schedule

14.2.1. Identification 14.2.2. Type of Residence/Housing 14.2.3. Preliminary Information

14.3. Population Study: Measures

15. STATISTICAL METHODS

15.1. Introduction

15.2. Measures of Central Tendency

15.3. Measures of Dispersion

15.4. Correlation and Regression

15.5. Tests of Significance

15.6. Collection of Data

15.7. Compilation and Presentation of Statistical Data

15.7.1. Tables 15.7.2. Graphs 15.7.3. Z Charts and Lorenz Curves 15.7.4. Diagrams

15.8. Graphing Frequency Distributions

15.9. Skewness

15.10. Phrases to Describe Correlation
