Language change
How To Change Language on Firefox. In the address bar of Firefox, type about: config and then press Enter to access your Firefox options. Next, in the search bar just below, enter string value general.useragent.locale. Right-click it and then select Modify. Enter en-us to change your browser language to English, or enter the code that applies to your desired language: If you’re not sure which code to use, you can view Firefox’s full list here. Confirm your settings by selecting OK and then restart your browser. Types of Language Change. Language is always changing. We’ve seen that language changes across space and across social group. Language also varies across time. Generation by generation, pronunciations evolve, new words are borrowed or invented, the meaning of old words drifts, and morphology develops or decays. The rate of change varies, but whether the changes are faster or slower, they build up until the “mother tongue” becomes arbitrarily distant and different.
