AND POLITICS OF RACIAL RESEARCH, by William H. Tucker. George L. Mosse's Toward the Final Solution: A History of European Racism is an important book which illustrates the author's formidable analytical ability and acute sensitivity to the many shadings and intricacies of the complex montage of European racism. Additionally, Mosse traces the manner in which racism was deposited, layer by layer, from the eighteenth through the twentieth centuries, upon the European intellect and in the thought processes of the masses of the European people. Planted in a fertile soil of fear of modernism, religious hatred, bigoted mysticism, corrupted science, and p
