Abstract

The proposed scheme occupies land within an area between the junctions of Salford Street and Penny Street (SD 68848 28175), Penny Street and Brown Street (SD 68523 28295) and Brown Street and Ainsworth Street (SD 68383 28310). Although the study area was currently occupied by Blackburn Market, it was situated at the historic core of the town, and in an area identified as being of considerable archaeological potential. To accompany the planning application, an Environmental Impact Assessment (EIA) was undertaken in 2012, for which Oxford Archaeology North (OA North) completed an assessment to determine the likely significant effects of the proposals on archaeology and cultural heritage as an environmental factor. A walkover survey was also undertaken by OA North in April 2012 in order to examine the current conditions within the proposed development area. Consequently, the planning officer at Lancashire County Archaeology Service (LCAS) advised that a condition was attached to the planning approval (planning ref: 10/12/0962) and that an archaeological watching brief should be undertaken in relation to any subsequent below-ground development works, particularly when the concrete foundation slabs from the market building were lifted and removed.

Item Type: Monograph (Project Report)

After that the existence of a structure is very dangerous. So removal of such structures with proper safety measures has got great importance. There are different steps involved before and during the time of a demolition activity. They are described as follows. www.studymafia.org. Steps before demolition. The different steps before the execution of a demolition process are: 1. Surveying 2. Removal of hazardous materials 3. Preparation of plan 4. Stability report 5. Safety measures. Surveying Surveying means study of different parameters of the structure and its surroundings. There are two type Initial demolition work actually began Saturday, when contractors began removing interior lighting. A huge mural of a mermaid inside the building, as well as a Tricentennial mosaic on the western side of the building, will be saved. The library, which sustained about three feet of water in Hurricane Katrina, was declared “functionally and economically obsolete” by engineers. Demolition of the 30,000-square-foot building is expected to take 61 days, but contractors hope to finish the $200,000 job in about 45 days. Online video. To take a video tour of the Katrina-ravaged library, shot shortly a All info on Market Hall Snack Bar in Blackburn - Call to book a table.
