Type: Undergraduate senior honors thesis.
Archival ID: A-330
Degree: Thesis (B.T.)
Department: Honors College

Abstract:
For my Honors Thesis I was a peer mentor for a section of Muncie 101 and I created five modules about Muncie that will become the backbone for a comprehensive website about Muncie. When I came to Ball State University as a freshman I knew nothing about the city of Muncie. Since then I have learned about the city through many experiences and come to call it a second home. These experiences include taking a course, Muncie 101 that was designed to introduce freshmen to Muncie, taking a course, Women of Middletown, focusing on the women of Muncie, and exploring the city on my own. Looking back, I see all that I have learned and realize the value of getting to know Muncie.

Creek, a regulated stream in the Central Valley of California, were sampled over a 5-yr period, 1994-1998. Distinct fish assemblages were observed in the lower 37 km of stream using two-way indicator species analysis (TWIN-SPAN) and canonical correspondence analysis (CCA). The assemblages segregated in an upstream-to-downstream manner. Distinct differences were found between assemblages of native and nonnative fishes and their association with environmental variables and habitat use. An Honors Project (HONRS 499) Rebecca A Niles, Sheryl Swingley. Thesis Advisor. SHARE.
