The usage of technology in a school plays an important role. It is said to be one of the factors that cause a digital divide amongst schools. Reasons are as followed; putting computers in the classroom does not automatically decrease the divide. The outcome of investing in computers should be for the benefit of the students. Students must be able to manipulate their skills on the technology thus improving the learning process. Doing so would mean analyzing how the students are making use of the computer technology provided to them. Features for a Short-Duration Science Outreach Intervention in K-12 Classrooms. What Good Is a Scientist in the Classroom? Participant Outcomes and Program Design.
