
This is the implementation manual of a programme that teaches mothers how to care, talk and play with their child in a way to improve their development. When they get older, this will help them to be ready for school and be happy and well behaved children. The programme uses a new approach of including parenting in routine child health visits.

Abstract
This is the implementation manual of a programme that teaches mothers how to care, talk and play with their child in a way to improve their development. When they get older, this will help them to be ready for school and be happy and well behaved children. The programme uses a new approach of including parenting in routine child health visits.
