The future of work: The promise of the new digital work society

Now, in this new edition of his classic work, the New York Times bestselling author provides topical updates with a sweeping new analysis of how the Internet has changed business and society in the last 20 years, covering: Natural frictions between present-day Industrial Capitalism and the Digital Economy. Praise for the new edition of The Digital Economy. “1994 was a good year. The Age of Networked Intelligence is an age of promise. It is not simply about the networking of technology but about the networking of humans through technology. It is not an age of smart machines but of humans who through networks can combine their intelligence, knowledge, and creativity for breakthroughs in the creation of wealth and social development."
