Cities have become very attractive places because they offer people not only jobs and work but also many things they can do in their free time. You can go to museums or art exhibitions, relax in public parks, listen to music at concerts or eat out at expensive restaurants that offer food from all over the world.

Beginning in the mid-1980s, the government enacted numerous antipollution policies in Mexico City with varied degrees of success. Measures such as vehicle emissions inspections, the introduction of unleaded gasoline, and the installation of catalytic converters on new vehicles helped reduce pollution generated by trucks and buses. Mexico City is a bustling, enormous, modern city, one of the largest in the world. Triple-decker highways and gigantic tunnels bore through the mountainous terrain. Towering skyscrapers, enormous cathedrals and one of the world's largest squares sit impressively atop a gigantic drained lake. Everywhere there are signs of the Aztec empire which came before - in the street names, the festivals, the food, and the eyes and skin of the population. It is
truly one of the most fascinating cities I've ever been to. Mexico is also one of the most unequal countries in the world. At one point, the world
