Between hazards of starvation and risk of predation: the ecology of offshore animals

Excellence in Ecology: Book 12

Between Hazards of Starvation and Risk of Predation: The Ecology of Offshore Animals

Z. Maciej Gliwicz

Department of Hydrobiology, University of Warsaw, 02-097 Warsaw, ul. Banacha 2, Poland

Professor Maciej Gliwicz was elected by the ECI Jury chaired by Professor Winfried Lampert (Max-Planck-Institut für Limnologie, Plön, Germany), for his outstanding contributions to the field of plankton ecology, in particular regarding the interactions between phyto- and zooplankton and the mechanisms of top-down and bottom-up control. Born in Warsaw, Poland, Maciej Gliwicz obtained his Ph.D. in 1969 from the University of Warsaw, which always remained his base, while he also conducted research in Panama, USA, Portugal, Mozambique and Germany, as well as in Poland’s Mazurian Lake Region. Maciej Gliwicz is now Director of the Department of Hydrobiology of the University of Warsaw.

EE Book 12 is the outcome of years of offshore studies, of intimate personal experience and of extended discussions with colleagues from all parts of the globe. Without losing sight of major contemporary topics, Maciej Gliwicz focuses on strategies of survival and of energy procurement, on the conflict between the need for protection and the search for food, exploring a wealth of facts, concepts and theories.

Books are sold at cost price. A considerable number of books are donated to libraries in less developed countries.
