Participatory Networks: The Library As Conversation
R. David Lankes, Joanne Silverstein, Scott Nicholson

Abstract

The goal of the technology brief is to familiarize library decision-makers with the opportunities and challenges of participatory networks. In order to accomplish this goal the brief is divided into four sections (excluding an overview and a detailed statement of goal):

- a conceptual framework for understanding and evaluating participatory networks;
- a discussion of key concepts and technologies in participatory networks drawn primarily from Web 2.0 and Library 2.0;
- a merging of the conceptual framework with the technological discussion to present a roadmap for library systems development; and
- a set of recommendations to foster greater discussion and action on the topic of participatory networks and, more broadly, participatory librarianship.

This summary will highlight the discussions in each of these four topics. For consistency, the section numbers and titles from the full brief are used.

This guide seeks to provide perspectives, tools and experiences regarding how to go about it with participatory communication strategies. It is conceived as a guide to be of relevance and utility for development workers in the field. It is targeted at both government and their officials, World Bank staff, and at civil society. The particular relevance of this guide is three-fold...
