www.complexityandeducation.ca. 111. Heutagogy. It is surprising to see heutagogy spring up in so many places such as curricula documents and theory papers despite only a modicum of good research evidence to support it. Mind you, this should not discourage thinking at a theoretical level. The second agenda, which may be related to the first, is to understand further how learning takes place in complex adaptive systems and then how to harness and facilitate these processes. He was director of an MBA level program for ten years, and is still a guest presenter on a number of postgraduate courses. With Dr Stewart Hase in 2000, he introduced Heutagogy as a new approach to learning. Chris Kenyon. Stewart Hase is an academic, psychologist and psychotherapist, educator and consultant. Until the end of 2007 he is employed at Southern Cross University in the Graduate College of Management, in Northern NSW, Australia, where he has been for 19 years. At the end of the year he is going into semi-retirement and will pursue other interests as well as consulting should he be able to find anyone to drag him away from golf, fishing, surfing, walking, reading and writing. It’s tough but someone has to do it!
