Reframing Information Literacy as a Metaliteracy

Thomas P. Mackey, Trudi E. Jacobson

Abstract
Social media environments and online communities are innovative collaborative technologies that challenge traditional definitions of information literacy. Metaliteracy is an overarching and self-referential framework that integrates emerging technologies and unifies multiple literacy types. This redefinition of information literacy expands the scope of generally understood information competencies and places a particular emphasis on producing and sharing information in participatory digital environments.

"Reframing Information Literacy as a Metaliteracy." College and Research Libraries 72, no. 1 (2011): 62-78. 9. Metacognition is an awareness and understanding of one's own thought processes. Information possesses several dimensions of value, including as a commodity, as a means of education, as a means to influence, and as a means of negotiating and understanding the world. Legal and socioeconomic interests influence information production and dissemination. The value of information is manifested in various contexts, including publishing practices, access to information, the commodification of personal information, and intellectual property laws. Reframing information literacy as a metaliteracy. College & Research Libraries, crl-76r1. ability of a citizen to access, analyze, and produce information for specific outcomes. Prepares individuals to 'use information in such a way that others can learn from them'. Digital Literacy. ability to access networked computer resources and use them. Inclusion of 'digital technologies'. prepare learner to function in knowledge society. Metaliteracy. Understand format type and delivery mode. Evaluate dynamic content critically. Metaliteracy will be examined as a reframing of information literacy. This presentation also reports on the successful Innovative Instruction Technology Grant (IITG) at SUNY that led to new metaliteracy learning objectives. Published in: Education. TomThis is our visual model to explain Metaliteracy (pause)We see this as a flexible, circular model that builds on information literacy with new technologies and competencies (pause)Metaliteracy expands information literacy to include the ability to produce, share, and collaborate in open learning and social media environments (pause)Metaliteracy also includes a central focus on metacognition, or the ability to think about.
