The Challenge of Linking Research and Practice - jstor 27 Feb 2015. Teacher standing in front of class with students hands raised what each of these research-based, best classroom practices looks like in the
Research linking instructional practices and students' academic performance seems to converge in its findings: what teachers do in the classroom is a good predictor of their students' achievement (Brophy, 2000; Seidel & Shavelson, 2007; Hattie, 2009; Creemers & Kyriakides, 2008). Instructional practices consistently predict students' learning outcomes and their effects have been shown to be larger than teachers' background qualifications or their beliefs and attitudes (Kyriakides, Campbell, & Gagatsis, 2000; Nye, Konstanopoulos, & Hedges, 2004; Muijs & Reynolds, 2002; Palar...)

PART I Teaching Practices in Primary Schools in the EU. Much of what happens in primary classrooms reflects a number of rituals and routines that have largely become an unconscious part of teachers' repertoires. While these 'rituals of practice' provide a framework or structure to learning in classrooms, they are often left unexamined. This paper outlines some rituals of practice in primary classrooms in the Arts (dance, drama, music and visual art). It outlines the nature of these rituals and discusses how some were disrupted by teachers-as-researchers in collaboration with their university colleagues in a joint research project. The findings suggest that research partnerships of this nature provide a supportive environment for questioning assumptions and enacting alternatives that promote learning.
