The idea that we must choose between a healthy environment and a healthy economy is a myth says David Goldstein, author of Saving Energy, Growing Jobs. Not only do well-conceived environmental regulations create more jobs, they also contribute to more efficient designs and less expensive products. Drawing on his experience as a research scientist and Energy Program Co-Director for the Natural Resources Defense Council, Goldstein points out that we already have a 30-year history of success built around regulation, technological innovation, and energy efficiency. Not only do well-conceived environmental regulations create more jobs, in the long run they contribute to more efficient designs and less expensive products. Standing between us and a cleaner, more prosperous society is the resistance of economic incumbents and a misplaced ideological opposition to any kind of regulation, even though it might prove beneficial.
