Spatial Organization: The Geographer's View Of The World

Ronald Abler; John S. Adams; Peter R. Gould

Economic geography has been defined by the geographers as the study of human's economic activities under varying sets of conditions which is associated with production, location, distribution, consumption, exchange of resources, and spatial organization of economic activities across the world. It represents a traditional subfield of the discipline of geography. However, many economists have also approached the field in ways more typical of the discipline of economics.
