Stitched in time: a progressive interpretation of embroidery
Furniss, Beverly

Abstract
This practice-based art and design project explores the potential use of contemporary materials and techniques in relation to extending aesthetic and structural possibilities of embroidery, with a focus on developing textile formations through the medium of ‘free stitch’ machine embroidery.... A piece of cloth must be stitched at once even if slightly torn. If ignored, the hole or tear in the cloth may be widened beyond repair. In that case, the cloth may become useless. Similarly, if the engine of a motorcar is causing some problem, the same should be tackled immediately to prevent future damage. The walls should be repaired even if there is a small crack in it. If neglected, the small crack may get broadened that may affect the longevity of the building. If a person falls ill, he should seek medical advice immediately. It is very important to check bad habits at an early stage; el
