One reason for this growth may stem from the fact that investors are paying more attention to such terms as corporate governance, social responsibility, sustainability, and environmental impact, and these factors are having an increasingly greater influence on where they decide to invest their money. Now that more assets are flowing into the ESG space, taking it from the fringe to the mainstream, this resource imbalance appears to be changing. As mentioned above, ESG assets grew from $639 billion to $3.07 trillion between 1995 and 2010, outpacing the growth of overall market assets by 120 percent. Download Citation on ResearchGate | On Nov 1, 2002, Gary R Mullins and others published Sustainability: from fringe to mainstream.
