The Best American Science and Nature Writing is a yearly anthology of popular science magazine articles published in the United States. It was started in 2000 and is part of The Best American Series published by Houghton Mifflin. Articles are chosen using the same procedure with other titles in the Best American series; the series editor chooses about 100 article candidates, from which the guest editor picks 25 or so for publication; the remaining runner-up articles listed in the appendix. Science writers get into the game with all kinds of noble, high-minded ambitions. We want to educate. To enlighten,” notes guest editor Amy Stewart in her introduction to The Best American Science and Nature Writing 2016. “But at the end of the day, we're all writers . . . We're here to play for the folks.”
