Abstract
Book Review: In Christchurch, New Zealand, in 2010 and 2011, a series of earthquakes destroyed buildings, caused liquefaction, and deprived survivors of electricity, transport routes, and water. Canterbury University student, Sam Johnson, used Facebook to mobilize other student volunteers (the ‘Student Volunteer Army’, http://www.sva.org.nz), who helped to ameliorate the effects of the earthquakes. With this example in mind of how social media was successively used by local people following a... Read more

Peacelearning and Its Relationship to the Teaching of Nonviolence. A Response... The Technology of Nonviolence: Social Media and Violence Prevention by Joseph G. Bock, International Social Science Review, 2014 In The Technology of Nonviolence, Joseph Bock describes and documents technology-enhanced efforts to stop violence before it happens in Africa, Asia, and the United States. Once peacekeeping was the purview of international observers, but today local citizens take violence prevention into their own hands. In this book Joe Bock makes a significant step into unpacking and suggesting creative ways to respond to this dilemma. I say that as a practitioner-scholar with thirty years of experience in community conflict and as a critic of the difficulties that Save. As he stated in his address at the opening of the MIT Center for Collective Intelligence in 2006: Sometimes collective intelligence is good; sometimes it isn't. Sometimes it
