### Why Does this Site Require Cookies?

This site uses cookies to improve performance by remembering that you are logged in when you go from page to page. To provide access without cookies would require the site to create a new session for every page you visit, which slows the system down to an unacceptable level.

### What Gets Stored in a Cookie?

In general, only the information that you provide, or the choices you make while visiting a web site, can be stored in a cookie. For example, the site cannot determine your email name unless you choose to type it. Allowing a website to create a cookie does not give that or any other site access to the rest of your computer, and only the site that created the cookie can read it.

Are the electronic media exacerbating illiteracy and making our children stupid? On the contrary, says Colin McCabe, they have the potential to make us truly literate. The debate surrounding literacy is one of the most charged in education. Schools are generally seen as institutions where the book rules - film, television and recorded sound have almost no place; but it is not clear that this opposition is appropriate. While you may not need to read and write to watch television, you certainly need to be able to read and write in order to make programmes. A. how best to teach the skills of reading and writing. B. how best to incorporate technology into classroom teaching. C. finding the means to purchase technological equipment. No book about eBooks is complete without an explicit discussion of content preparation, i.e., how the electronic book is written. Hence, Chapter 6 delves into the underlying representation of eBooks and efforts to create and apply markup standards to them. This chapter also examines how print genres have made the journey to digital and how some emerging digital genres might be realized as eBooks. This book is worth reading. Some of my critiques are minor and clearly a book (or any other document) cannot comment on something that did not exist before it was published (e.g. the iPad).
