As the sixth king of the first lineage of Babylon, Hammurabi is well known for his legal nature of the command. His eight-foot-high curved tablets and the earliest organized law ever to be found on the site as examples. His governing code ranks as an ‘eye for an eye’ justice approach written in in the Babylonian vernacular. Primarily known as ‘Timur The Lane’, Tamerlane was born in the modern day Uzbekistan around 400 miles north of the city of Kabul. He suffered slight paralysis on his one side during childhood. He went on to become the senior minister in the chamber of Mongol Khan and overthrew the rule to claim himself the king. No list of top kings in the world is completed without Genghis Khan perched on top. Originally named as Temujin from Borjigin, he was born into the Khan tribe.
