Critique of Intelligent Design is a direct reply to the criticisms of intelligent design proponents and a compelling account of the long debate between... Proponents of intelligent design creationism in a more subtle guise have recently reigned the age-old war between materialism and creationism, in which they claim to elevate their doctrine to empirical truth and thus incorporate it into science curricula. They attack modern science, advancing a pseudo-scientific view and a reactionary political culture in line with their theology and what they perceive as a knowable moral order. Separate chapters are devoted to the design debate in antiquity, the Enlightenment and natural theology, Marx, Darwin, and Freud, and to current scientific debates over evolution and design. Critique of Intelligent Design: Materialism Versus Creationism from Antiquity to the Present. New York: Monthly Review Press. ISBN 978-1-58367-173-3. 4. From the Classroom to the Courtroom: Intelligent Design and the Constitution, by Jay D. Wexler. 5 When the Classroom Door Closes, Who Teaches Evolution?, by Brian Alters. 6 Defending the Teaching of Evolution, by Glenn Branch and the staff of the National Center for Science Education.
