Saugus Iron Works National Historic Site. From Wikipedia. (Redirected from Saugus Ironworks). Jump to: navigation, search. Saugus Iron Works National Historic Site.  The blast furnace, forge, rolling and slitting mill, warehouse, and dock area are all reconstructed on original sites and are based upon extensive archaeological excavations done between 1948 and 1953 by Roland W. Robbins. Hundreds of court records, inventories, and accounts of the original iron works were also consulted to produce a full-size (albeit, conjectural) model of the seventeenth century iron works. 1 work Search for books with subject Roland Wells Robbins (1908-1987). Search. Publishing History. This is a chart to show the publishing history of editions of works about this subject. Along the X axis is time, and on the y axis is the count of editions published. Click here to skip the chart. Reset chart or continue zooming in. This graph charts editions published on this subject. Robbins abruptly left the Iron Works in 1953.[16] Robbins departure came not long after a dispute with Bent, who wanted Robbins to give tours of the excavation site on weekends in addition to his other duties.[13] According to archaeologist and author Donald W. Linebaugh, it was also due in part because of the decision of the FIWA to base the reconstruction of the Iron Works primarily on documentary evidence instead of archaeological evidence.
