Fifty Strategies for Teaching English Language Learners. (4th ed.). Adrienne Herrell and Michael Jordan. Boston, MA: Pearson, 2012. If you are looking for an easy-to-read and quick guide to a variety of English teaching activities, this book might be of interest to you. Just as it states, it has 50 different strategies or activities that you can use. They include strategies for active involvement, language and literacy development, content instruction, and how to use technology.

When you open the book, right inside the front cover you'll find a list, in alphabetical order, of the 50 strategies, followed by their definitions, rationales, and step-by-step implementation instructions; and, all are specifically tied to the most current ELL standards. Included use of current Teachers of English to Speakers of Other Languages (TESOL) standards ensures future teachers learn strategies that support TESOL's three goals, nine standards, and three grade-level groupings - supports teachers' documentation of standards-based planning and teaching, as well as monitoring and individualization of instruction for ELL.
