Critical Care Obstetrics

Steve L Clark

Obstetric. The Maternal Critical Care Working Group was composed of experts. Thus, maternal critical care can be distinguished from high risk obstetrics because.
Critical care in obstetrics is an upcoming specialty in the developing countries. This book is first of its kind as there are very few books written on this subject with the South East Asian perspective. The book discusses various aspects of critical care in obstetrics starting from the basic principles, physiology, ethics, monitoring and organization of a critical care unit. The various chapters cover management of life-threatening illnesses involving various organ systems of the body of a pregnant woman. Care of obstetrics patients in disaster settings. Complications of central venous catheters and their prevention. Critical illness during pregnancy and the peripartum period View in Chinese. Definition, classification, etiology, and pathophysiology of shock in adults View in Chinese. Indications, interpretation, and techniques for arterial catheterization for invasive monitoring View in Chinese.
